

Army Air

The Army Air flight crews have the experience you need to accomplish your test in a safe and professional manner. Their specialty is aircraft test support; the majority of the services are provided routinely to WSMR customers in the desert and mountains that encompass WSMR, New Mexico and southwest United States. Expert maintenance staff is capable of adapting your test equipment to our aircraft. Structures, avionics, and quality assurance technicians specialize in interfacing project electrical and structural components with aircraft systems. Special equipment and components can be mounted both internally and externally to meet customer requirements.

Our fleet

1 Beech King Air 200 (C-12) Fixed Wing Aircraft

4 UH-1 H (Bell 205) Helicopters

4 UH-72 (BK 117) Helicopters

Our specialty is aircraft test support. The bulk of our services are provided routinely to WSMR customers in the desert and mountains that encompass WSMR, NM and Southwest USA.
